Pert. 2: Andrew Viron Victorio /32 200091

2. a Elemen Marsimol = b, m terurut

Elemen Minimal: a,b,c sebagian?

(b) BA {a,b,d} = {a,d,i,h,i,K,l,m} n {b,d,e,i,h,i,K,l,m} n {c,f,g,K,l,m}

= { K, l, m}

(Sup (M) : {K}

(C) BB (f,9,L) = (t,c), (h, d,e,a,b)

Inf (N) = -

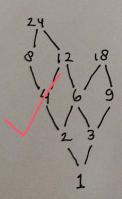

③ P= {1, 2, 3, 4, 6, 8, 9, 12, 18, 24}

PRATAMA

 $R = \{(1.15, (2.15), (3.25), (4.47), (6.16), (8.85), (9.75), (12.72), (18.78), (24.24), (1.2), (1.3), (1.47), (1.48),$ 

Sisa: {(1,2), (1,3), (2,4), (2,6), (3,6), (3,9), (4,8), (4,12), (6,12), (6,18), (8,24), (9,18), (12,24)}

@ Diagrom Hasse

(C) A= {3,4}

BA (A): {3,6,9,12,18,24) n {4,0,12,24}

Sup (A) = {12}

@ Q={8,18}

BB(Q)= {0,4,2,1} n { 18,6,9,2,3,1}

= {2,1}

Inf(Q) = {2}

6 Elemen Maximal = EY & 18

Elemen Minimal = 1

(4) Jawabannya sg "b", karena Pada pertama kali dicaba antara {d,ey -> tidak memiliki Infimum No.4-I

Coba lihat lagi, no 4 Yg ditanyakan apa ya
